

INFECTIOUS DISEASES

Boehringer Ingelheim welcomes collaborations with partners in **infectious disease**, who share our passion for improving the health and wellbeing of animals, to help us find solutions to some of the biggest challenges in animal health today.

Pursuing Innovation

- Leveraging our track record of expertise in vaccines and infectious diseases
- Research focus on:
 - Emerging diseases, neonatal diarrhoea in livestock
 - PRRS, Mycoplasma
 - Vaccine technologies, mucosal delivery
 - Antibiotic alternatives
 - Digital innovation for improving and monitoring health and treatment administration.

Actively pursuing new partnerships in our areas of interest and open to a variety of partnership models to explore:

- Transboundary and emerging diseases
- Infectious diseases impacting food animal production
- Enhanced vaccine coverage for new variants of infectious agents
- Prevention and therapeutic strategies.
