

Current and Potential Future Options to Fight COVID-19

Fighting the Virus

Fighting the Disease

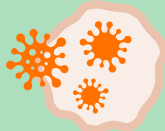

1

Masks
Reduce the risk of virus transmission

2*

* Investigational Treatments

Vaccines
Aim to fire up the immune system against virus

Antibodies
Aim to block virus from entering cells

Antivirals
Aim to reduce virus production in infected cells

3*

Antiinflammatory treatments
Aim to reduce hyperinflammation

Thrombolytics
Aim to reduce microcoagulation
